NGUYEN NGOC TAM

0824608716 - nguyenngoctam1609@gmail.com - linkedin.com/in/ngoctam1609 - Ho Chi Minh

EDUCATION

Industrial University of Ho Chi Minh City **Ho Chi Minh**
Information technology *09/2019 - 02/2022*

TECHNICAL SKILLS

Programming Languages: PHP (7.x/8.x), JavaScript, TypeScript.
PHP Framework/Library: Laravel, CodeIgniter, PHPUnit, JWT/Firebase JWT, Guzzle, Kendo UI, WebSockets, WebRTC.
Databases & Caching: PostgreSQL, MongoDB, SQL Server, Redis.
Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes (K8s), GitLab CI/CD, GitHub Actions, Nginx, Linux, Webhooks, Postback.
Architecture & Others: RESTful APIs, MVVM, Agile/Scrum.

WORK EXPERIENCE

SOUTH TELECOM **07/2022 - Present**
Full-stack Developer

- Collaborated with senior engineers to develop new features and solve technical problems.
- Produced modern, high-performance, and maintainable code for a wide range of projects.
- Estimated and optimized the company's expenditures for cloud services.
- Trained new engineers on processes and technical skills to help them develop and confidently solve problems independently.
- Developed and enhanced product features based on user requirements, ensuring high usability and alignment with business goals.
- Integrated third-party CRM platforms such as Salesforce and HubSpot.
- Investigated, troubleshot, and resolved customer-reported issues to maintain system stability and improve user satisfaction.
- Built and optimized real-time communication channels for both calling and messaging, including Zalo, WhatsApp, LiveChat, LINE, and other OTT-based services.
- Collaborated cross-functionally with product, QA, and support teams to deliver reliable solutions in an agile development environment.
- Served as Scrum Host (Facilitator), coordinating sprint ceremonies, ensuring smooth communication within the team, removing blockers, and promoting continuous improvement throughout the development cycle.

INTERN IN R-DIGITAL **04/2022 - 07/2022**
Backend Developer

- Collaborating with the front-end developers and other team members to establish objectives and design More functional, cohesive codes to enhance the user experience.+ Report daily project progress for leaders.

PROJECTS

- **Worldfone4X | Full-stack Developer**
  Worldfone4X is a comprehensive Omnichannel Contact Center platform that unifies voice, social media, and CRM integration into a single streamlined communication ecosystem.
  Responsibilities:
  - Developed and enhanced product features based on customer requirements, including CRM integrations and internal tooling.
  - Integrated third-party platforms such as Salesforce and HubSpot for data synchronization and workflow automation.
  - Troubleshot and resolved customer-reported issues to maintain system stability and improve performance.
  - Built and optimized real-time communication channels across Zalo, WhatsApp, LiveChat, LINE, and other OTT services.
  - Served as Scrum Host, facilitating sprint ceremonies, tracking progress, and removing blockers for the development team.
  - Optimized high-performance modules in the Omnichat component, improving message throughput and reducing peak-time latency.

Technologies: PHP, MongoDB, Redis, Beanstalkd, Kendo, JavaScript, Websocket
Team size: 10

- **Shinhan Life | Full-stack Developer**
  Responsibilities:
  - Resolved SonarQube code quality issues, ensuring compliance with enterprise security and maintainability standards, reducing code smells by 85%.
  - Identified and fixed Cross-site Scripting (XSS) vulnerabilities to improve system security and protect sensitive financial data.
  - Implemented unit tests for core business functions, increasing test coverage and preventing regression.
  - Deployed and customized the Worldfone4X platform onsite at Shinhan Life, ensuring smooth integration with their internal workflows, working closely with the client's IT and business departments throughout the deployment phase.
  - Integrated and synchronized Worldfone4X with Shinhan Life's internal APIs, ensuring stable data exchange and meeting their enterprise communication workflow requirements.

  Technologies: PHP, MongoDB, Redis, Beanstalkd, Kendo, JavaScript, Websocket
  Team size: 2

- **PVcomBank | Full-stack Developer**
  Responsibilities:
  - Developed a standalone real-time communication module for PVcomBank, including secure video call functionality using WebRTC and custom signaling infrastructure.
  - Optimized message delivery speed and chat distribution logic, reducing latency and improving throughput for high-traffic banking communication scenarios.
  - Integrated the communication platform with PVcomBank's internal APIs for customer verification, session management, and logging workflows.
  - Improved overall system performance by enhancing WebSocket handling, load balancing behavior, and data serialization to ensure stable real-time interactions.
  - Ensured compliance with banking-grade security requirements by implementing encrypted media channels, secure token-based authentication, and strict data-access controls.

  Technologies: PHP, MongoDB, Redis, Beanstalkd, Kendo, JavaScript, Websocket
  Team size: 3

- **Video Room Integration System | Full-stack Developer**
  Responsibilities:
  - Architected a real-time video streaming backend leveraging Laravel, Janus WebRTC Server, and Jitsi.
  - Leveraged Laravel Queues (Redis) for asynchronous processing of intensive Janus events, ensuring zero application downtime under heavy load.
  - Designed optimized MongoDB schemas to efficiently store, process, and audit historical session data and room events.
  - Synchronized and processed complex video room event data, including user joined, leaving, and unpublished events, between Janus and Jitsi platforms.
  - Transformed and mapped Janus event payloads to seamlessly match Jitsi's occupant metadata structure, ensuring cross-platform data consistency.
  - Implemented **Laravel Task Scheduling** to automate the cleanup of expired Janus sessions and temporary room data in the database.

  Technologies: PHP, Laravel, Janus WebRTC, Jitsi, MongoDB, Redis, WebSockets
  Team size: 2
